## 1.1 Contents

### 1.1.1 Usage

#### Installation

To use Lumache, first install it using pip:

```
(.venv) $ pip install lumache
```

### Creating recipes

To retrieve a list of random ingredients, you can use the `lumache.get_random_ingredients()` function:

The `kind` parameter should be either `"meat"`, `"fish"`, or `"veggies"`. Otherwise, `lumache.get_random_ingredients()` will raise an exception.

For example:

```
>>> import lumache
>>> lumache.get_random_ingredients()
['shells', 'gorgonzola', 'parsley']
```

### 1.1.2 API

Lumache has its documentation hosted on [Read the Docs](#).
